PERSONAL DETAILS

Nationality: Cambodian
Date of Birth: Jan 24, 2005
Gender: Male | Single

LANGUAGES

Khmer Native
English Intermediate / Technical Reading

CORE TECH SKILLS

React / Vue.js 3
TypeScript / JS
Flutter & Dart
Laravel / PHP
Supabase / PostgreSQL
Tailwind CSS
C# .NET
Bakong KHQR / ABA Payway
Spring boot

AI CODING AGENTS

Claude, OpenAI Codex, Google Antigravity, OpenCode

REFERENCES

Horn Samath

Professor, National University of Battambang

PROFESSIONAL SUMMARY

Self-driven full-stack developer and educator based in Battambang, Cambodia, in the final year of an Information Technology degree at the National University of Battambang. Builds complete, production-ready applications end-to-end from database design to deployed UI across React, Vue.js, and Flutter, independently learning each stack by shipping real products used by real customers. Combines this with hands-on classroom teaching experience in primary education and computer literacy.

WORK & TEACHING EXPERIENCE

Computer Skills Instructor (MS Office, Photoshop, Basic Arduino)

2024 – Present

សាលាបណ្តុះបណ្តាលកុំព្យូទ័រស្វាយធំ

- Teaches practical computer literacy classes covering Microsoft Office, Adobe Photoshop, and introductory Arduino/electronics concepts.

Primary School Teacher, Grade 3

Nov 2024 – Present

បឋមសិក្សាស្វាយជាតិ

- Delivers grade 3 primary curriculum and builds supporting learning materials for young students.

KEY PROJECTS

OnlinePhsar (KhShop) Multi-Tenant E-Commerce SaaS **LIVE**

Stack: React · TypeScript · Tailwind CSS · Supabase (PostgreSQL + Edge Functions) · Zustand

- Full-stack SaaS platform for Cambodian Facebook merchants with subscription + transaction-fee billing (Starter \$9/mo + 2%, Pro \$20/mo + 1%).
- Merchant dashboard for products/variants, orders, Pro-tier analytics, billing, and store settings, plus an admin panel for all merchant stores.
- Live Bakong KHQR payments via Supabase Edge Functions — dynamic QR generation, real-time payment polling, and auto-confirmation at checkout.
- Public storefront with Zustand cart state, real-time order tracking, PDF/CSV export, Telegram/email notifications; fully bilingual (Khmer/English).

Primary School Management System (PSMS) **LIVE PILOT · IN DEVELOPMENT**

Stack: Vue.js 3 · Vite · Tailwind CSS · Supabase (PostgreSQL + Row-Level Security)

- Khmer-first multi-tenant school management PWA, piloted at a school in Battambang with directors and teachers.
- Covers student records, attendance, scores, health records, library, and budget/inventory with role-based access.
- Multi-tenant isolation via Supabase Row-Level Security; offline-first PWA support for low-connectivity classrooms.

QRServe QR Ordering System **LIVE**

Stack: Vue.js 3 · Supabase (PostgreSQL) · LemonSqueezy · Vercel

- Full-stack SaaS QR-code ordering platform for restaurants with a real-time order dashboard and subscription billing.

PawPass Pet Health Passport App [PUBLISHED ON GOOGLE PLAY](#)

Stack: Flutter · Dart · Supabase · RevenueCat · PostgreSQL

- Pet health tracking with PDF passport export and RevenueCat subscription billing; passed Google Play 14-day closed testing with 25 testers.

Other Projects

- FreelanceFlow Flutter · Supabase · Riverpod client/invoice management, published on Google Play (testing).
- Science Lab Flutter · custom physics engine physics simulation app, 100+ organic installs.
- Flora AI Flutter · Google Gemini API plant identifier & care planner.
- BankSim Kotlin · Firebase banking app simulation with P2P transfers.
- Inventory Management System Vue.js 3 · Laravel · MySQL full-stack app with Inertia.js SSR.
- ToDoApp C# .NET · Vue.js full-stack to-do list app with authentication, live on GitHub Pages.

EDUCATION

Bachelor of Information Technology

Jan 2025

National University of Battambang — Year 4 (Final Year)

TECHNICAL SKILLS

Frontend / Web: React, TypeScript, JavaScript, Vue.js 3, HTML5, CSS3, Tailwind CSS, Inertia.js

Mobile: Flutter (iOS & Android), Dart, Kotlin (Native Android)

Backend & APIs: Supabase Edge Functions (serverless TypeScript), Laravel (PHP), REST APIs, Spring boot

Databases: PostgreSQL (Supabase), MySQL, Firebase, SQLite, SQL Server

Payments & AI: Bakong KHQR, LemonSqueezy, RevenueCat, Google Gemini AI API, ABA payway

Tools: Git, GitHub, Vercel, Android Studio, VS Code

Design & Productivity: Microsoft Word, Excel, PowerPoint, Adobe Photoshop, CapCut, DaVinci Resolve

HOBBIES & INTERESTS

I love technology and building things through software and web development. I'm always eager to learn new tech, work on personal coding projects, and share what I know with others.
